Nátaly Andrea Cárdenas Izáquita

Data Science | Data Visualization | Machine Learning | AI
Barranquilla, Atlántico, Colombia

Summary

I am passionate about transforming data into strategic, real-world solutions. As a Data Science student, I combine a strong analytical mindset with a results-oriented approach—viewing every data discrepancy or challenge as an opportunity to deliver efficient solutions.In my role as Secretary on the executive board of Singularity (our student-led Data Science organization), I take an active leadership approach by coordinating academic initiatives, fostering team collaboration, and driving continuous learning within the tech community.What defines me:- Ambition and Excellence: Committed to continuous improvement and high-quality delivery across all projects.- Proactivity: Problem-solving mindset focused on innovation and efficiency.- Continuous Learning: Driven by curiosity to master emerging technologies, frameworks, and tools in the data ecosystem.Open to connecting with industry professionals, collaborating on challenging data science projects, and exploring opportunities in data analytics and machine learning.

Experience

Singularity | Grupo de Ciencia de Datos e IA
1 year 4 months

Secretary General
July 2026 - Present (4 months)
Barranquilla, Atlántico, Colombia

Executive board leadership role driving operations, governance, and community growth for the university’s premier Data Science and AI student association.

Key Responsibilities and Accomplishments:

- Operational Governance: Coordinate executive board communications, structure agenda items, and track action plans to ensure strategic goals are met.
- Community Engagement: Streamline internal workflows and communication channels, fostering active participation and knowledge-sharing among members.

Director of Logistics
July 2025 - June 2026 (1 year)

Managed end-to-end event execution, venue logistics, and resource optimization for group initiatives and academic workshops.

Key Responsibilities anda Accomplishments:
- Event Planning and Logistics: Coordinated logistics for university-wide data science events, hackathons, and technical lectures.
- Resource Management: Managed venue bookings, technical setup, and material distribution to guarantee seamless event execution.
